

# Harvest Electronics

## *Rural Fire Portable Weather Station*

The Harvest rural fire portable weather stations are designed for rapid temporary deployment during fires or exercises.

### Kit Includes:

- Harvest telemetry data logger with Iridium satellite modem
- Weatherproof enclosure with solar panel and battery
- Ultrasonic wind speed and direction sensor
- Hydrological Services rain gauge
- Portable 2m mast (including all mounting gear, takes 5-10 minutes to erect)
- Rugged portable box for all components for transport (approximately 1.2m x 0.5m x 0.8m)

For pricing, contact Harvest on [sales@harvest.com](mailto:sales@harvest.com) or 06 370 1991.

The complete kit is supplied in a rugged plywood box which can be carried on the back of a ute or flown to site in a helicopter.

The kit includes a 1.8m two piece mast with guy wires which can be installed in a few minutes with the supplied hammer.

The weather station uses the Iridium satellite network for communication so it will work anywhere without concern about cellphone coverage.
